

Riza Rohman - Full Stack Developer

Malang, Indonesia · rizarohman@ritaro.dev · +62 878-5582-6341 · [linkedin.com/in/riza-rohman](https://www.linkedin.com/in/riza-rohman) · github.com/ritarodev10 · ritaro.dev

SUMMARY

Full-stack developer (4+ yrs) specializing in React/Next.js and Node.js, building AI-powered automation, dashboards, multi-site systems, and cloud-deployed apps. Experienced working with teams across Canada, USA, Europe, and Asia. Daily user of Cursor + MCP for rapid refactors, code generation, and production-grade tooling.

Strengths: Next.js architectures, dashboard systems, AI automation, RAG workflows, cloud deployment.

EXPERIENCES

[CloudNow](#) — Full-Stack Developer (Remote, Canada) · Dec 2024–Present

CloudNow provides cloud solutions, IT consulting, hosting, and cybersecurity services.

- Building and maintaining company + client sites end-to-end (UI/UX, frontend, backend, deployment).
- Shipping internal dashboards and client platforms with clean, scalable API integrations.
- Delivering **Mailtrace** (DMARC SaaS) to improve email deliverability insights.
- Developing reusable **admin + RAG + page-builder kit** using n8n workflows to cut launch time.

Stack: Next.js, TypeScript, Tailwind, n8n, OpenAI, Postgres, Supabase, Strapi, Azure, GitHub Actions.

[Ingersoll Rand](#) — Frontend Developer (Remote, US) · Nov 2024–Mar 2025

Ingersoll Rand is a global industrial technology manufacturer specializing in compressors, pumps, fluid systems, and mission-critical industrial tools.

- Built a **multi-site template** (Next.js + Contentstack) to accelerate brand rollouts across subsidiaries.
- Converted Figma design system into atomic components for consistent global usage.

Stack: Next.js, Contentstack, GraphQL, SCSS, TypeScript.

[Monis](#) (Desent Solution GmbH) — Full-Stack Developer (Remote, Germany) · Sep 2024–Aug 2025

Monis is a global rental marketplace for ergonomic desks, chairs, and productivity equipment.

- Developed **advanced checkout system** supporting subscription-based renting, renewals, and automated billing workflows.
- Built **admin dashboard for merchants** to manage rentals, extensions, pickup schedules, and customer issue resolution.
- Built WhatsApp automation + AI chatbot handling **300+ daily notifications** and auto-resolving ~80% inquiries.
- Implemented automated return scheduling (**20+/day**), improving on-time returns by ~30%.

Stack: Next.js, TypeScript, Strapi, Stripe, Express, n8n, Tailwind.

[NavDeck](#) — Frontend Developer (Remote, Singapore) · Apr 2024–Aug 2024

NavDeck helps companies map skill sets and generate AI-driven learning plans.

- Co-built Next.js dashboard (team of 3) from design to MVP using agile delivery.
- Added **AI-driven career mapping** and an **AI-powered LMS** with dynamic challenges.

Stack: Next.js, TypeScript, Zustand, TanStack Query, Tailwind, WebSocket.

[Beamco](#) — Frontend Developer (Remote, Singapore) · Apr 2023–Mar 2024

Beamco is a music & artist community platform integrating blockchain and real-time fan engagement.

- Led a team delivering the official site, admin dashboard, and artist dashboard.
- Built an offline concert stage screen integrated with mobile app real-time tipping via WebSocket.

Stack: React, React Native, TypeScript, Tailwind, WebSocket, Firebase, Jest/RTL.

[G2Academy](#) — Full-Stack Developer (Jakarta) · Jan 2022–Feb 2023

G2Academy is Indonesia's tech education and bootcamp organization serving enterprises and students.

- Redesigned React company site for better navigation & conversion.
- Overhauled student CMS/admin (Vue) for national "Program Prakerja" reporting.
- Developed and maintained mobile app modules powering the real-time tipping feature.
- Developed backend services using Java Spring Boot.

Stack: React, Vue, TypeScript, Spring Boot, Tailwind.

[Ternaknesia](#) — Web Developer (Surabaya) · Apr 2018–Feb 2020

Ternaknesia is an agritech company focusing on digital livestock commerce and online farming investment.

- Developed and optimized the company's primary website for better UX and consistent branding.
- Implemented gamification and viral marketing workflows to drive digital platform interaction.
- Contributed to milestones including **200+ products sold** and **300M+ rupiah revenue**, supporting overall digital growth.

Stack: WordPress, WooCommerce, PHP, jQuery, MySQL, Elementor, Whatsapp API

SELECTED PROJECT

- [Hire My Trailer](#) – Built a full-featured trailer rental platform using Nuxt.js, integrating secure payments and real-time booking that improved customer ratings from 3 → 4.2
- **Hijra Planner** – Developed e-commerce and referral platform using WooCommerce, driving 200K+ app downloads and 500+ product sales in two weeks through viral marketing workflow using Whatsapp chatbot integration.
- **Pertamina Geothermal (PGE)** – Created an internal inventory dashboard using React and a WordPress REST API, enabling real-time tracking and WhatsApp notifications that reduced tool loss and improved operational accuracy.

SKILLS

Frontend: React, Next.js, Vue/Nuxt, React Native, TypeScript, Tailwind, Zustand, Jest

Backend: Node.js (Express), Laravel, Spring Boot · REST, GraphQL

Data & Cloud: PostgreSQL/MySQL, MongoDB, Supabase (pgvector), Firebase, Azure App Service

AI & Tooling: n8n, OpenAI API, Cursor IDE, GitHub Actions, Storybook, WebSocket, PWA, Lighthouse

WordPress: WooCommerce, ACF, custom themes/plugins, WP REST API

EDUCATION

B.Eng., Physics Engineering — Sepuluh Nopember Institute of Technology (2011–2016)

B.Sc., Informatics (incomplete) — Sepuluh Nopember Institute of Technology (2009–2011)
